**RE: Chelsea Building Products Passes Miami-Dade Testing for its 400I Product**

**OAKMONT, PA (March 26, 2014)** — Chelsea Building Products announces that its latest window series for the impact and coastal markets, the 400I Series has passed the rigorous testing required for Miami-Dade County, Florida. Specifically, it meets the Miami-Dade County Large Missile TAS201, TAS202, TAS203, High Velocity Hurricane Zone and Miami-Dade requirements.

Passing the Miami-Dade test means that the 400I also passes Wind Zones 1, 2, 3 and 4 as well. The single hung, XO horizontal slider and picture window meets Missile Level D and Wind Zone 4 Impact test rating in accordance with ASTM E 1886-05 and ASTM E 1996-05. Wind Zone 4 testing requires that a window can withstand 140 mph winds. It meets AAMA Grade LC50 structural test standards with upgrades available to meet light commercial Grade LC65.

The product features 1" IG capabilities, triple weather stripping and double walled handle on the sash system. The 3-<sup>1</sup>/<sub>4</sub>" frame system incorporates a double wall exterior flange, unique triple weather stripped pocket sill, <sup>3</sup>/<sub>4</sub>" balance pocket and multi-hollow profiles designed for optimum thermal and structural performance.

This coastal product is available in new construction and replacement configurations. The frames are available for wood and concrete block installation. The contoured frame features the double wall "Florida" flange. The beveled millwork style exterior offers a pleasant, aesthetic design complete with subtle accessory grooves.
